

Artist Bio

Mr Twin Sister formed in 2008 under the name Twin Sister, quickly garnering critical attention from the dense homemade pop of their early EPs - **Vampires with Dreaming Kids** in 2008 and **Color Your Life** in 2010. They have been a quietly influential fixture of independent music ever since. The group released their debut LP **In Heaven** (2011) via Domino, and in 2012 their song **Meet the Frownies** was sampled by **Kendrick Lamar and Dr Dre** on **The Recipe**. Having left Domino and changed their name to Mr Twin Sister, the group re-emerged in 2014 with the low lit disco and funk of their self-titled **Mr Twin Sister**. The record appeared on best-of-year lists from Pitchfork, Gorilla vs Bear, TIME, and many others. In 2018 the group released **Echo Arms**, their most popular track to date, and **Salt**, their third and most diverse album yet. 2021 saw the release of the group's fourth full length LP **Al Mundo Azul**, a vibrant, surreal record that swaps the group's restrained cool for something wide awake and grinning. Mr Twin Sister has made a habit of swerving the expectations of their devoted following and critical outlets alike, recombining musical styles and dodging easy categorization as a matter of course.
