

Bitch is a longstanding queer music icon who Yahoo Entertainment called "a feminist force that the world needs now more than ever" when she released *Bitchcraft*, her 9th studio album, on the legendary label Kill Rock Stars in 2022. With her signature electric violin and lyrical smarts front and center over huge beats and deep synths, Bitch coined the genre "Poet Pop" and she has been touring nationally ever since, igniting her loyal following and inspiring new followers with her colorful and bold stage shows.

"*Bitchcraft* is a masterpiece," said Amy Ray of the Indigo Girls, who, along with Ani DiFranco, have taken Bitch on tour as their opener. Joey Soloway (Transparent) directed the music video for "Easy Target."
